# Cross Reference

## Cable to Connector Cross Reference

---

RF Connectors, Division of RF Industries, 7610 Miramar Road, San Diego, CA 92126-4202  
For product information call (800) 233-1728 or (858) 549-6340, Fax: (858) 549-6345  
E-mail: [rfi@rfindustries.com](mailto:rfi@rfindustries.com) Web: [www.rfindustries.com](http://www.rfindustries.com)

## HOW TO USE THIS MANUAL

This manual is organized first by DABURN Cable groups and second by the types of RFI connectors available for those groups. The connectors are divided into subgroups by type.

Each connector listing contains the RFI part number, the description and the materials used for each connector. The materials listings consist of the body, shell, pin/contact, and dielectric.

The Cable Number Locator below is supplied for easy cross-referencing by cable number to page number.

### *Example:*

*You need to know if RFI has an N Male Clamp Solder Plug for DABURN 1923.*

*Refer to the table below for DABURN 1923. Go to page 8. Under the heading for DABURN 1923 you will find RFB-1701-D and RFB-1707-D.*

From the description and the materials information you are able to determine if one of these connectors works for your application. The legend on page two explains the material codes used in this manual.

**Part numbers with an (\*) are special order only.** If you have special requirements, please contact RF Industries' sales department for assistance.

**DABURN Cable Number Locator**

Cable #	Page #	Cable #	Page #	Cable #	Page #	Cable #	Page #
1923	8	1928C	4	1931A	8	D187A/U	11
1925	9	1929	4	D6/U	10	D188A/U	3
1925C	9	1929C	4	D62A	8	D196A/U	2
1925F	9	1930	8	D142B/U	7	D213/U	9
1925X	11	1930C	8	D174/U	3	D214/U	10
1927	10	1930F	8	D178B/U	2	D316/U	3
1928	4	1930L	8	D179B/U	11		

*The information found in this guide was compiled using specifications that were current at the time of compilation. Please note that manufacturer's specifications are subject to change without notice. We therefore suggest that after using this guide to make your initial connector selections, you should obtain the latest product specifications from this cable manufacturer and RF Industries.*

Cable assemblies using any Daburn cable with any standard RF connector listed here are available in any specified length with short lead times. All flexible crimp cable assemblies are fabricated with soldered center contacts and adhesive lined shrink tubing for additional cable retention and strain relief.

More cable to connector cross references are available which include: Alpha, Antenna Specialist, BICCGeneral, Belden, Carol, Comm/Scope, Cushcraft Ultralink, CCI/Intercomp, Dearborn, General/Guardian, GEPCO, Harbour Industries, Haverhill, Manhattan CDT, Micro-Coax, Military, National, Remece, Saxton, Standard Wire, Thermax CDT, Times Microwave, WestPenn CDT.

Regarding any requirement you may have, please contact RF Industries at the following address:

7610 Miramar Road, San Diego, CA 92126-4202
