HOW TO USE THIS MANUAL

This manual is organized first by **Harbour Industries** Cable groups and second by the types of RFI connectors available for those groups. The connectors are divided into subgroups by type.

Each connector listing contains the RFI part number, the description and the materials used for each connector. The materials listings consist of the body, shell, pin/contact, and dielectric.

The Cable Number Locator below is supplied for easy cross-referencing by cable number to page number.

Example:

*You need to know if RFI has an N Male Straight Crimp Plug for **Harbour HPP100**.*

*Refer to the table below for **Harbour HPP100**. Go to page 3. Under the heading for CN316SC, CN316TC, HIS316, HPP100, LN316, M17/113-RG316, M17/172-00001, RG 188A/U, SB316 you will find RFN-1005-B-03.*

From the description and the materials information you are able to determine if one of these connectors works for your application. The legend on page two explains the material codes used in this manual.

Part numbers with an (*) are special order only. If you have special requirements, please contact RF Industries' sales department for assistance.
